Project Title: Bone Wars

I'd like to build this microsite mainly as one long page, divided by sections, as it is more of a narrative, and therefore I think it should be shaped that way in how it is presented. There is not too much of imagery on the Wikipedia page, but I think imagery can easily be sourced from other Wikipedia pages about bones/dinosaur discoveries, as well as a simple google search for bone imagery.

Outline:

Introduction – Give a taste/short summary of what the Bone Wars are about.

Key Players – Introduce the two main characters in the “war”, and establish their rivalry through visuals. Give background on their individual lives.

History – History of the Bone War, divided by subsections

- Background
- 1872–1877: Early expeditions
- 1877–1892: Como Bluff finds
- Personal disputes and later years

Legacy & Summary – Discuss outcome and legacy of the war to conclude.
