

- Layer bones more naturally. Can do a large png file, even.
- Maintain consistent spacing throughout the website.
- Potentially alter the colors more, or use the home color in the other games so its not all so similar.
- Add more imagery! A bit empty in some areas.
- Decrease the spacing between the nav and the shadow.
- Increase leading all throughout, especially footer.
- Footer could be in columns.
- "Bone Wars" seems small and empty.
- Have some sort of marker of what section a user is on. Some sections don't have headings.
